STORAGE & HANDLING

Talc Powder should be stored in a cool, dry, and well-ventilated area to prevent moisture absorption, which can alter its flow characteristics. Although it is not classified as hazardous, keeping the containers tightly sealed prevents contamination and maintains the integrity of its analytical specifications.

- Store in a cool, dry place away from moisture.
- Use appropriate PPE, including gloves and dust masks, when handling.
- Avoid contact with incompatible materials such as strong acids.
- Keep containers tightly closed when not in use to prevent contamination.
